

ABOUT THE PROGRAM

This program introduces students to the basics of robotics through simple, hands-on activities. Students learn about basic components, simple electronics, and robot movement while building their first robot. The focus is on making technology easy, engaging, and interactive, helping students develop curiosity and confidence in working with robotics.

TECHNOLOGY &
INNOVATION

WHY THIS PROGRAM?

Hands-on introduction to robotics

Fun-based learning through RC Bots

Improves creativity and problem-solving

Develops teamwork through Robo Soccer

Builds interest in STEM learning

Foundation for future robotics skills

Ideal starting point for beginners

WHERE IDEAS TURN
Into Real Robots

PROGRAM OUTCOMES

- Understand basic robot components
- Learn simple electronics and circuits
- Control basic robot movements
- Build and operate a simple robot

PROGRAM FLOW

Foundations of Robotics:

Introduction to robots and basic components

Basic Electronics :

Understanding motors, wheels, batteries, and circuits

Robot Movement Concepts:

Learning direction, motion, and control basics

RC Bot Building:

Assemble and build a beginner-friendly RC Bot

Remote Control Operation:

Learn wired/wireless bot control and navigation

Robo Soccer Challenge:

Team-based activities to improve teamwork.

FOR STUDENTS OF GRADE 5
